

## ● AFGHAN CRISIS

## Taliban prepare to announce new govt amid eco turmoil

The legitimacy of the government in the eyes of global investors will be crucial for economy

REUTERS  
September 2

AFGHANISTAN'S NEW TALIBAN rulers were preparing their government on Thursday, more than two weeks after the Islamist militia's capture of Kabul brought a chaotic end to 20 years of war, while the economy teetered near collapse.

Taliban official Ahmadullah Muttaqi said on social media a ceremony was being prepared at the presidential palace in Kabul and Taliban spokesman Zabihullah Mujahid said a new government was a matter of a few days away.

The legitimacy of the government in the eyes of international donors and investors will be crucial for the economy as the country battles drought and the ravages of a conflict that took the lives of an estimated 240,000 Afghans.

The Taliban have promised safe passage out of the country for any foreigners or Afghans left behind by the huge airlift which ended when US troops withdrew on Monday.

But with Kabul airport still closed, many were seeking to flee over land.

Qatar's foreign minister said the Gulf state was talking with the Taliban and Turkey about potential technical support to restart operations at Kabul airport, which would facilitate humanitarian assistance and possibly more evacuations.

British foreign secretary Dominic Raab told the same news conference in Doha "we need to adjust to the new reality" in Afghanistan and said he would be talking with regional leaders about securing safe passage through third countries.

"Our immediate priority is...those remaining British na-

tions, and also the Afghans who worked for the United Kingdom and others who may be at the most risk," Raab said.

The Taliban's supreme leader, Haibatullah Akhundzada, is expected to have ultimate power over a new governing council, with a president below him, a senior Taliban official told Reuters last month.

The supreme Taliban leader has three deputies — Mawlawi Yaqoob, son of the movement's late founder Mullah Omar, Sirajuddin Haqqani, leader of the powerful Haqqani network, and Abdul Ghani Baradar, one of the founding members of the group.

An unelected leadership council is how the Taliban ran their 1996-2001 government, which enforced a radical form of sharia Islamic law until it was ousted by US-led forces.

The Taliban have tried to present a more moderate face to the world since they swept aside Afghanistan's US-backed government last month, promising to protect human rights and refrain from reprisals against old enemies.

The Taliban have asked Afghan diplomats to stay in overseas posts for the time being, according to a source with direct knowledge of the move. The militant group had made clear there would eventually be change but also wanted to maintain a sense of continuity, the source said.

But the United States, the European Union and others have cast doubt on such assurances, saying formal recognition of the new government — and the economic aid that would flow from that — is contingent on action.

The foreign minister of current EU president Slovenia told Reuters the bloc was "far from even tackling this question", which EU leaders might discuss at summits next month. Some EU states consider the Taliban a terrorist organisation.

If the European Union - the world's biggest aid donor - decides to formally recognise the Taliban government, "aid is the leverage that the European Union has" in setting conditions, Anne Logar said.

On Wednesday, US Undersecretary of State Victoria Nuland had said the United States would look at deeds not words.

"So they've got a lot to prove... they also have a lot to gain, if they can run Afghanistan, far, far differently than they did the last time they were in power," she said.

In Kabul, "a real change has come into the city" resident Zahid Ullah said. "The environment and peace is good but issues with wages since no one knows who is running the country. People are unemployed and searching for work."

Humanitarian organisations have warned of catastrophe as severe drought and war have forced thousands of families to flee their homes.

Afghanistan desperately needs money, and the Taliban are unlikely to get swift access to the roughly \$10 billion in assets mostly held abroad by the Afghan central bank.

The new central bank head has sought to reassure banks the group wants a fully functioning financial system, but has given little detail on how it will provide the liquidity needed, bankers familiar with the matter said.

Afghanistan's economy is expected to collapse by 9.7% this financial year and 5.2% next year, Fitch said in a report.

Foreign investment would be needed to support a more optimistic outlook, a scenario that assumed "some major economies, namely China and potentially Russia, would accept the Taliban as the legitimate government".

## China's crackdown on video games gives America an edge

TAE KIM  
September 2

CHINA IS NOT a fan of video games. Earlier this week, a government agency announced new rules that would restrict the time that minors can play on-line games to about three hours a week — down drastically from a prior limit of roughly 10 hours. Beijing has said the constraints were imposed to protect its youth from becoming addicted to gaming and getting distracted from their studies. But are games really so dangerous to young minds?

I don't think so. For decades, critics have called gaming a detriment to society without any hard proof. The negativity is an antiquated view that doesn't match reality. In fact, there is increasing evidence that video games can be beneficial in several areas. Let's start with the basics: Most parents know that games such as Microsoft's Minecraft and Roblox's platform can stimulate thinking, spark creativity and help develop problem-solving skills.

But that's just the beginning. Powerful technology titans have credited video games for putting them on a path to success. In 2015, Facebook chief executive officer Mark Zuckerberg said he would never have gotten into programming if he hadn't played games when he was younger, adding that his passion for making games developed his technical skills. And it's not just coding. Gaming can help people advance in their professional ca-

reers. Shopify CEO Tobi Lutke said he has learned more about effectively running a business from playing Starcraft — a modern-day version of chess where players allocate resources with incomplete information — than he ever attained from reading books. "Strategy games look simple but they teach you complex system decision-making in a way that not much else can," he posted on social media. Researchers have backed up the claim: According to one academic study, performance in strategy games can indicate managerial competence among job applicants.

In a way, Zuckerberg and Lutke's stories are similar to my own. Video games were instrumental in sparking my life-long interest in technology. When I was younger, I built a new computer nearly every year, mostly so I could figure out how to use the latest chip advancements to get the best performance from the lat-

est Doom or Quake game. I wouldn't be here today without my interest in gaming.

It seems many lack understanding of what gaming entails today. Compared with passively watching television, it is an active experience where players can learn how to make smart decisions under pressure. I have played hundreds of hours of a game called Counter-Strike, in which every round requires constant game-theory-type thinking to anticipate what the opponent will do next, along with real-time verbal collaboration with team members on tactics to win. It's not just "twitch" ability or playing Ms. Pac-Man anymore. These are skills that are useful in life. And today's multiplayer games are also the means by which many young adults hang out with their friends. In the past, they may have attended a weekly poker game. Now, they catch up by playing Epic Games' Fortnite together.
